Innovative Patented

ANTI-ROTATION DEVICES

Axial fans that are allowed to spin backwards pose a safety risk to workers, can break expensive belts or damage other rotating equipment. Click on this green phrase to see video “why this is an issue”.

This advanced DG-II ARD fits all QD and TL, fan pulley bushings. With the addition of the C-ring, the DG-II kit will fit any fan shaft that sticks past the fan pulley by 1” as shown in the center picture above.

C-Ring, not part of DG-II Kit, sold separately

See how universal the patented DG-II mounts to any system by clicking on “this installation video”.

DG-II™ kits comes complete with a special anti-corrosive coating. This coating has “Salt Spray Test” results up to 1000 hours
